

# Three research positions are available for data products at Verizon Connect / Florence (Italy)

Three calls for permanent research positions are now open at [Verizon Connect](#), via Paisiello 26, Firenze.

All of them are for Data Products, one is for a Senior Data Scientist, one for a Research Engineer and another one for a Data Scientist.

The reason this call is publicized here is twofold: it is an interesting opportunity for those interested in the activities of our lab and also it is a set of positions offered by KKT, a startup born from this lab.

Please help us to distribute this call.
