

GOL optimized the Italian Volley Tournament schedule for 2016/17

We successfully developed a mixed integer optimization model to solve the complex problem of scheduling the volley tournament.

An [official post](#) from the Italian Volley League is now [available](#)

The schedule has been officially presented in Bologna – a [video](#) of the whole event is available. If you go to minute 27 you will hear credits to our team by [Alessandro Antinelli](#), a well known italian sport journalist
